Sign Post Flasher
FLASHING SIGN SYSTEM

WRONG WAY

⬥TRAFFICALM®

SIGN POST FLASHER

TraffiCalm® Sign Post Flashers bring unmatched illumination and driver awareness to traffic sign locations that have been prone to crashes. They are designed to enhance the traditional sign post reflector and to be paired with TraffiCalm's Flashing LED Sign Rings. The entire system is virtually impossible to miss and increases visibility, especially in adverse weather and nighttime conditions.

You really have to see it to understand how impactful these safety devices are. The Sign Post Flasher "anchors" the location of a sign in the driver's mind and helps with depth perception and the location of the stop bar, for example.

FEATURES

Highly Visible LED Flashers

TraffiCalm enhances the visibility of the sign post reflector with LEDs to punch through environmental conditions where visibility is limited.

Easy-to-Install Retrofittable LED Strip

The Sign Post Flasher is supplied with double-sided 3M VHB tape on the back of the casing, so you can just peel and stick the flasher to an existing sign post or sign post reflector.

Ruggedized Electronics

Environmentally sealed electronics in epoxy-potting and heavy-gauge aluminum housings built for road use. Tough LEDs are rated at 100,000 hours of operation at constant, full output!

MUTCD Compliant

Flashes at the MUTCD rate of once per second and will flash in unison with TraffiCalm Flashing LED Sign Rings that are fully MUTCD compliant.

Made in the USA

TraffiCalm Flashing Sign Systems are manufactured in the USA in an ISO 9001:2015 certified facility, meeting and exceeding industry and state testing requirements. TraffiCalm signs are unmatched in durability, brightness, accuracy, and ease of installation and use. Build America/Buy America Compliant.

Limited Warranty
5 YEAR
Exclusions Apply, see warranty statement for details

SPECIFICATIONS

█ Sign Post Flasher

60 in / 152.4 cm long x .61 in / 1.59 cm wide

Power Requirement: 2.4 Watts, 12V input

Mounting provisions: 3M VHB pressure sensitive adhesive across full length of back of flasher with 3M primer included for maximum bonding to reflective sheeting
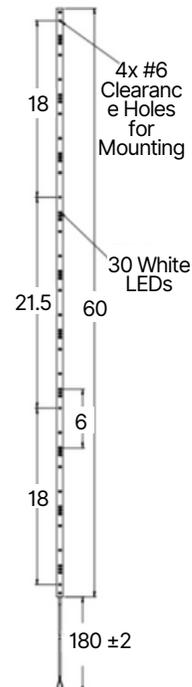

Compatibility: All TraffiCalm Flashing Sign System Controllers and Collaborators. Will flash in unison with TraffiCalm Flashing LED Sign Rings

Installation Recommendations: Apply to existing (or new) rigid sign post reflector (minimum 60" high) to maximize visibility and environmental contrast
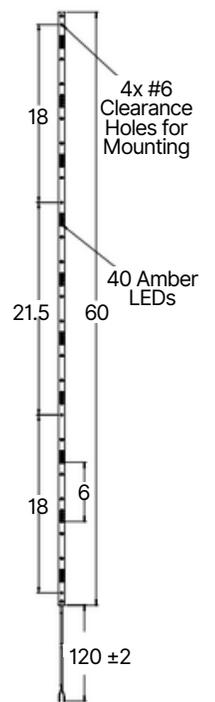

Sign Post Flashers with Red LEDs

18 — 4x #6 Clearance Holes for Mounting
