

SPEED COMPLIANCE SYSTEM

Radar activated driver feedback signs have become the industry go-to for discreetly suggesting driver behavior and slowing violators to a reasonable speed. With radar activation, Speed Compliance represents a new generation of affordable, yet effective, driver feedback technology

Convey a clear message to drivers and draw straightforward attention to the posted speed limit with Speed Compliance.

Details

Consisting of just a TrafficCalm™ Controller (see options below), a radar add-on, and any TrafficCalm™ Regulatory Enhancement Ring, this inexpensive approach to driver feedback provides a highly ergonomic awareness of the existing R2-1 Speed Limit sign.

As with all TrafficCalm™ products, retrofit installation utilizes the existing sign and post to minimize costs and construction time.

How To Order

Select One Of Four Options

M75-SA300-B242

Includes Gen 2 Controller, 20 Watt Solar Panel, 24x30" Flashing Ring, and Radar

M75-SA300-B243

Includes Gen 2 Controller, 30 Watt Solar Panel, 24x30" Flashing Ring, and Radar

M75-SA300-B362

Includes Gen 2 Controller, 20 Watt Solar Panel, 36x48" Flashing Ring, and Radar

M75-SA300-B363

Includes Gen 2 Controller, 30 Watt Solar Panel, 36x48" Flashing Ring, and Radar

* Systems do not include R2-1 Sign
